### 17.00 Conference closing

#### The objective of the event

The objective of the 2nd Central and South East Europe Energy Policy Forum is to bring together regional decision makers and industry representatives to advance electricity market integration according to the guidelines proposed by the 'Clean Energy for all Europeans' package.

This will specifically address intraday and balancing market integration, cross-border reserve-sharing, cross-border integration of capacity markets and the imperative for stronger regional cooperation of TSOs. All are key elements of the Winter Package proposal that, if implemented together, would bring electricity market integration to the next level ('Electricity Market Integration 2.0').

**Date:** 30<sup>th</sup> May 2017

**Venue:** Aranytíz Event Hall, Tolnay auditorium,  
Arany János utca 10., 1051 Budapest, Hungary
